PARTICIPATION IN THE HEALTH INFORMATION EXCHANGE NETWORK

Access to information about your health history, societal and behavioral factors, and medical care is critical to help ensure that you receive high-quality care and gives your health care provider a more complete picture of your overall health. This can help your provider make informed decisions about your care. Recent advancements in technology now support the safe and secure electronic exchange of important clinical information from one health care provider to another through Health Information Exchange (HIE) networks. The Department and its county health departments participate in an HIE network and also participate in several HIE networks with trusted outside health care providers to quickly and securely share your health information electronically among a network of health care providers, including physicians, hospitals, laboratories and pharmacies.
