

LISTING OF TANNING FACILITY SANITIZERS

Listed below are the brand names of sanitizers that have been found in tanning facilities around the state that meet the requirements of Tanning Facilities, Chapter 64E-17, of the Florida Administrative Code, and are approved for use. This is **NOT** an all-inclusive listing as there are several other sanitizers that meet the code requirements. Be sure to use test strips to measure the sanitizers for proper concentration levels, such as 200ppm-400ppm for quaternary ammonia. There are specific test strips for quaternary ammonia which is the main ingredient in most of these sanitizers. If you come across more sanitizers, please contact Jenelle Williams at (850) 901-6523 so that they may be added to the listing.
